

Here is a list of **100+ main project titles** for **Arts and Science College UG final-year Computer Science (CS) students**:

Web Development Projects

1. Online Student Management System
 2. E-Learning Platform with Video Streaming Support
 3. College Event Registration and Management System
 4. Online Hostel Management System
 5. Library Management System with RFID Integration
 6. Online Examination Portal with Automated Results
 7. Blood Donation and Management System
 8. E-Commerce Website for Local Businesses
 9. Online Food Delivery and Management System
 10. Alumni Management Portal
 11. Online Voting System with Secure Authentication
 12. College Placement Management System
 13. Timetable Management System for Colleges
 14. Online Internship Portal
 15. Digital Certificate Generation System
 16. Online Fee Payment System
 17. Faculty Leave Management System
 18. Campus News Portal
 19. Digital Notice Board System
 20. Student Feedback and Complaint System
-

Mobile App Development Projects

21. Online Attendance Management App
 22. Personal Health Tracker App
 23. Hostel Food Ordering App
 24. Study Planner and Timetable App
 25. Campus Navigation Mobile App
 26. Notes Sharing Platform for Students
 27. Fitness and Diet Monitoring App
 28. Library Book Locator App
 29. Exam Reminder and Notification App
 30. Online Grocery Shopping App
-

Artificial Intelligence (AI) and Machine Learning (ML) Projects

31. Chatbot for College Queries
32. Fake News Detection System
33. Student Performance Prediction System Using ML

34. AI-Based Course Recommendation System
 35. Personality Prediction Using AI
 36. Sentiment Analysis on Social Media Data
 37. Handwriting Recognition System
 38. Resume Screening System Using AI
 39. Smart Attendance System Using Face Recognition
 40. Exam Results Analysis Using ML
-

Cybersecurity Projects

41. Secure Online File Sharing System
 42. Phishing Website Detection Using ML
 43. Password Manager with Two-Factor Authentication
 44. Cyberbullying Detection on Social Media
 45. Secure Voting System Using Blockchain
 46. Web Application Security Testing Tool
 47. Secure Chat Application Using Encryption
 48. Intrusion Detection System for Networks
 49. Digital Forensic Analysis Platform
 50. Email Spam Detection System
-

Data Science Projects

51. Customer Segmentation Using Machine Learning
 52. Traffic Prediction and Analysis Using Data Science
 53. Disease Prediction System Using Healthcare Data
 54. Real-Time Stock Market Analysis
 55. Social Media Trends Analysis System
 56. Sports Performance Analytics Dashboard
 57. Weather Prediction Using Data Analytics
 58. Online Product Recommendation System
 59. College Performance Analytics Dashboard
 60. Fraud Detection in Online Transactions
-

Database Management System Projects

61. Student Information Management System
62. Hospital Management System
63. Inventory Management System for Libraries
64. Blood Bank Database System
65. Employee Attendance Management System
66. Online Retail Store Management System
67. Payroll Management System
68. Crime Record Management System

- 69. College Admission System
 - 70. Course Registration and Scheduling System
-

IoT Projects

- 71. IoT-Based Smart Attendance System
 - 72. Smart Home Automation System Using IoT
 - 73. Real-Time Bus Tracking System Using IoT
 - 74. Waste Management System Using IoT Sensors
 - 75. IoT-Based Weather Monitoring System
 - 76. Energy Usage Monitoring System Using IoT
 - 77. Vehicle Tracking System Using IoT
 - 78. Smart Parking System Using IoT
 - 79. IoT-Based Campus Security System
 - 80. Health Monitoring System Using IoT Devices
-

Cloud Computing Projects

- 81. Cloud-Based Library Management System
 - 82. Online Collaborative Learning Platform
 - 83. Cloud-Based File Storage and Sharing System
 - 84. Real-Time Chat Application Using Cloud Services
 - 85. Cloud-Based IoT Integration for Smart Cities
 - 86. Virtual Classroom Platform Using Cloud
 - 87. Cloud-Based Document Management System
 - 88. Secure Backup System for College Data
 - 89. Online Examination System on Cloud
 - 90. Cloud-Based Disaster Recovery System
-

Advanced Development Projects

- 91. Blockchain-Based Certification Verification System
 - 92. AI-Powered Virtual Assistant for Students
 - 93. Online Internship and Freelancing Platform
 - 94. Smart Traffic Management System Using AI
 - 95. Real-Time Language Translation System
 - 96. Online Exam Proctoring System Using AI
 - 97. Social Media Analytics Dashboard
 - 98. Facial Emotion Recognition System
 - 99. Virtual Reality Learning Environment
 - 100. Secure Document Sharing Using Blockchain
-

Let me know if you need more titles or detailed explanations for any of these!
